**At 12:14 CST on March 20th the sun will cross directly over the equator, signaling the beginning of Springtime in the northern hemisphere. This day has been significant for centuries. For us, it reminds us that warmth is returning and local produce will soon be aplenty.**

**Come join Page and Mary in a celebration of renewal. Welcome longer, sunnier days with surya namaskar. Breathe new life into your yoga practice through pranayama. Welcome spring rains by flowing through your asana practice.**
